

# Solar Development Opportunity

***TMC<sup>2</sup> Renewable***

**2024**

- TMC started project development business in Japan in August 2018
  - Portfolio of 100 MWp developed & secured at attractive tariff – Both under FIT & Bidding regime.
  - Pipeline of ~ 400 MWp is already under development with grid connections already applied
- TMC is amongst top green-field project developers in Japan in terms of number of projects under development
- Experienced Team of five members consisting of Developers, Engineers, Lawyers and Commercial experts is in place.
  - Team has experience of operating in Japan Solar market since 2012
  - Team has developed 20 solar projects in Japan (more than 150+ MWp)
  - Team has experience of developing solar projects in Europe, Japan & South Asia
- Company has established a network of trusted Land Arrangers in Japan for deal origination.

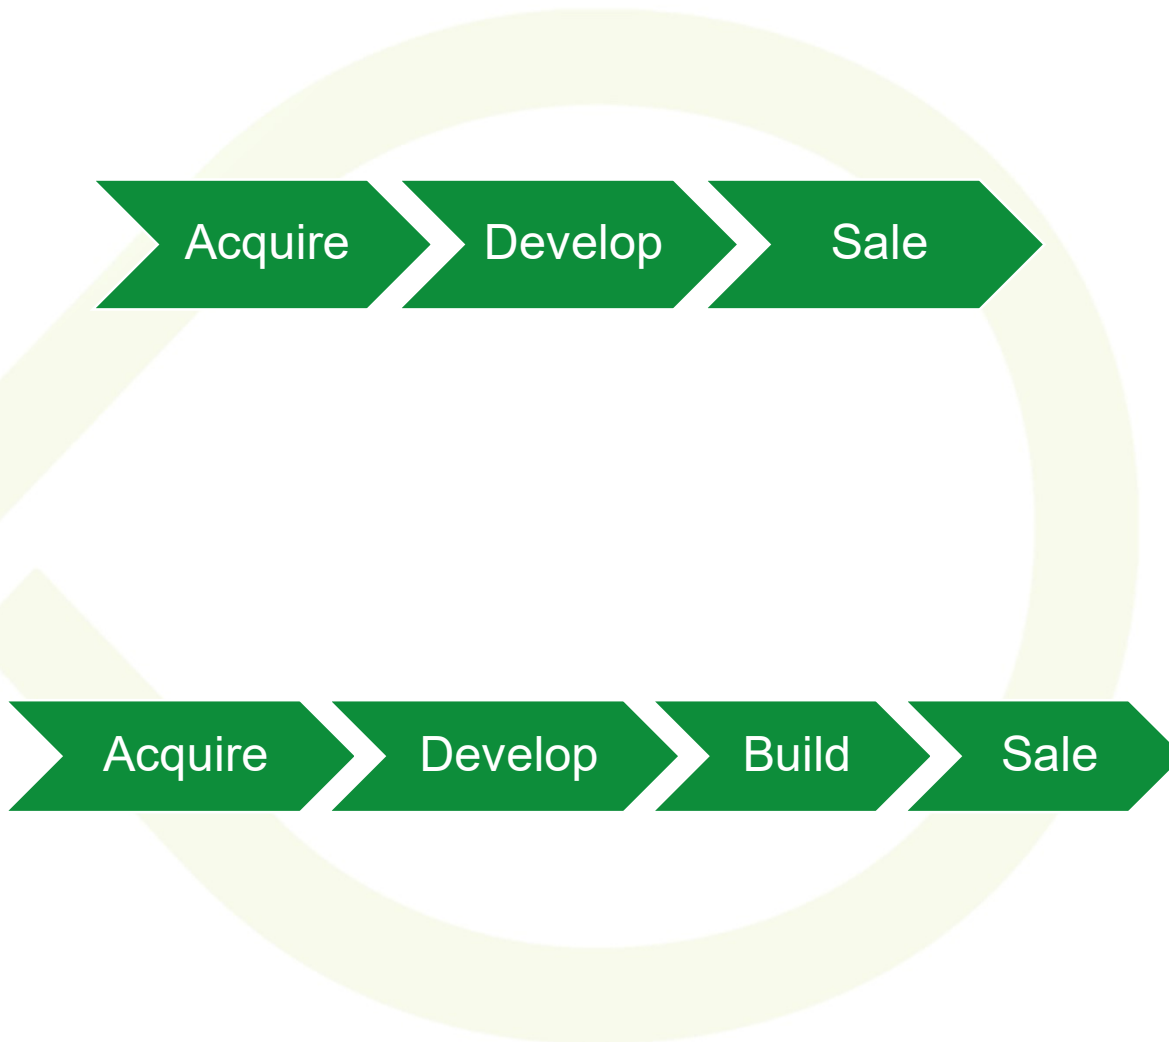

# Why is our team special ?

- We have Successfully created high yielding generating solar assets in developed/developing markets for more than 10 years. Working in Japan since 2012.
- Over **1 GWp** of projects have been originated and delivered to date.
- We have experience in multiple Geographies across **Japan, South Korea, Philippines, Indonesia, Bangladesh, India, Middle East, Germany, UK, Netherlands**
- Multi functional team capable of handling both bidding and as well as FIT projects

# How do we add additional value ?

- Greenfield Project Development :
  - Capacity aggregation
  - Improving the technical design -through optimization of capacity & energy generation we can create great value even in previously average projects.
- For part developed and greenfield projects :
  - We secure construction permits
- Signing of bankable PPA and GCA
- Management of relations with landowners, utility and government authorities
- Arranging debt finance
